May 30,  
2018

### **Gulf TREE – Mikaela Hemming**

Northern Gulf of Mexico Sentinel Site Cooperative

*Gulf TREE is a new decision support search engine designed to help stakeholders confidently identify the best resilience tool for their individual needs.*

July 25,  
2018

### **Microplastics Monitoring – Eric Sparks**

Mississippi State University/MS-AL Sea Grant

*Learn more about microplastic marine debris and a Gulfwide project training citizen scientists to collect data in this emerging field of study.*

Sept 26,  
2018

### **Tool Highlights – Dave Reed**

Florida Fish and Wildlife Conservation Commission

*Did you miss the GOMA All Hands Tools Café, or want more info on the top tools? Dave Reed, Data and Monitoring Team Co-Chair, will cover the latest tools for research, resilience, and conservation.*

Nov 28,  
2018

### **Harmful Algal Bloom Detection – Kate Hubbard**

Florida Fish and Wildlife Conservation Commission and  
Wildlife Research Institute

*Glider operations and expansion of handheld genetic sensors are being used to expand HAB detection. Find out how these technologies are improving seasonal forecasts, informing response, and reducing sampling costs.*

Pre-registration is not required
